(54) IMAGE READ SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To easily acquire the image of high quality having a large dynamic range of image data even without using a film holder, for which needs much labor.

SOLUTION: In the image read system for reading a transmissive original such as film, this system is provided with a means for shading the light emitted by a light source or the light transmitted through the transmitting original and receiving light only in the reading portion of the transmitting original. Thus, the image of high quality having a large dynamic range of the image data can be easily acquired even without using the film holder which needs much labor.
